Lauren Surles
Smyrna, TN | (615) 767-0091 | Lauren.a.surles@outlook.com
Computer Science student and IT graduate with experience in end-user support, high-volume ticketing workflows, technical troubleshooting, and software development. Skilled in documenting incidents, supporting users across phone, email, chat, and web-based systems, and maintaining SLA, quality, and data privacy requirements. Hands-on experience with ServiceNow, JIRA, Microsoft 365, Git/GitHub, HTML, CSS, JavaScript, REST APIs, JSON, and Python. Combines enterprise IT support experience with hands-on development of deployed web applications and interactive portfolio projects.

Core Competencies

- **IT Support & Service Desk: End-User Support, Ticket Management, Incident Documentation, Troubleshooting, SLA Adherence, Escalation, Multi-Channel Support**
- **Technical Platforms: ServiceNow (SNOW), JIRA, Microsoft 365, Teams, Outlook, Git, GitHub, GitHub Pages**
- **Programming & Development:** HTML, CSS, JavaScript, REST APIs, JSON, Python
- **Professional Strengths:** Active Listening, Conflict De-escalation, Quality Assurance, Data Privacy, Cross-Functional Collaboration

Technical Projects

laurenOS — Interactive Retro Desktop Portfolio | HTML, CSS, JavaScript, GitHub Pages
Live Demo: `https://pretty-pink-poodle.github.io/laurenOS/` **| GitHub:** `https://github.com/Pretty-Pink-Poodle/laurenOS`

- Built an interactive browser-based desktop portfolio with draggable windows, taskbar controls, Start menu navigation, persistent themes, notifications, and reusable application-style components.
- Developed dynamic Project Explorer, Credential Manager, Resume Viewer, Contact app, terminal commands, and an HTML Audio music player using DOM manipulation and event-driven JavaScript.
- Implemented localStorage-based preference persistence, responsive layouts, window state management, and GitHub Pages deployment.

TicketFlow — IT Service Desk Dashboard | HTML, CSS, JavaScript, GitHub Pages
Live Demo: `https://pretty-pink-poodle.github.io/ticketflow/` **| GitHub:** `https://github.com/Pretty-Pink-Poodle/ticketflow`

- Built an interactive IT service desk dashboard with ticket creation, technician assignment, status workflows, search, and multi-criteria filtering.
- Implemented localStorage persistence, automatic ticket ID generation, and dynamically updated ticket statistics.
- Designed a responsive interface modeled after common IT support and ticket-management workflows.

Y2K Weather App | HTML, CSS, JavaScript, REST APIs, GitHub Pages
Live Demo: `https://pretty-pink-poodle.github.io/weather-app/` **| GitHub:** `https://github.com/Pretty-Pink-Poodle/weather-app`

- Developed a responsive weather application using the Open-Meteo APIs to retrieve current conditions and five-day forecasts.
- Used asynchronous JavaScript, `fetch()`, JSON parsing, DOM manipulation, city search, and Fahrenheit/Celsius conversion.
- Created dynamic weather-based themes and deployed the application through GitHub Pages.

Professional Experience

Workstation Support Technician — State of Tennessee | Nashville, TN
March 2026 – September 2026

- Provided end-user technical support for workstation, account access, software, and connectivity issues through phone, ServiceNow, and written support channels.
- Imaged and configured workstations, performed hardware replacements, and installed and troubleshot monitors, docking stations, keyboards, mice, and other peripherals.
- Diagnosed hardware and software issues, documented troubleshooting steps and resolutions in ServiceNow, and escalated complex incidents to appropriate technical teams.

- Supported workstation setups and equipment deployments while ensuring devices and peripherals were properly configured for end users.
- Maintained accurate incident documentation and met SLA, quality assurance, identity verification, data privacy, and security requirements.

Help Desk & Customer Support Intern — Ingram Content Group | La Vergne, TN
October 2025 – January 2026

- Triaged end-user hardware, software, account, and access issues through phone, chat, and ticketing systems.
- Guided users through step-by-step troubleshooting and issue resolution while maintaining clear, customer-focused communication.
- Documented support interactions, ticket updates, inventory changes, and resolution details in accordance with internal procedures and quality standards.

Substitute Teacher — Rutherford County Schools | Murfreesboro, TN
August 2024 – May 2025

- Adapted quickly to changing classroom environments, schedules, and instructional requirements while maintaining organization and situational awareness.
- Used clear communication and conflict-resolution skills to support students and coordinate effectively with faculty and administrators.

Education
